

Flow-Factory OPD & Ensemble Eval Experiments

Flow-Factory

Generated 2026-05-22 09:31 UTC from W&B project Flow-Factory-OPD-Experiments

1 Experimental Setup

Offline `ensemble-eval` on SD3.5 Medium: FlowGRPO LoRA checkpoints are fused each denoising step, then evaluated on `geneval`, `pickscore`, and `ocr` held-out sets. Checkpoints: `jieliu/SD3.5M-FlowGRPO-Text` (OCR), `jieliu/SD3.5M-FlowGRPO-PickScore`, `jieliu/SD3.5M-FlowGRPO-GenEval`. Multi-teacher rows use AVG unless marked PCGRAD. Table 1: **bold** = single-teacher in-domain; gray = multi-teacher in-domain; red/blue = change vs. max single-teacher baseline in that row. OPD rows (*peak*) use the maximum eval logged so far.

2 Main Results

Table 1: Cross-benchmark `eval/` means. Top: offline ensemble-eval (last eval). Bottom: OPD training runs still **running** (peak eval). **Bold**: single-teacher in-domain.
